

# Montenegro Internet Exchange Point - 2021/2022 Report

Vladimir Gazivoda  
University of Montenegro

SEE 10/RIPE NCC Regional Meeting in Ljubljana

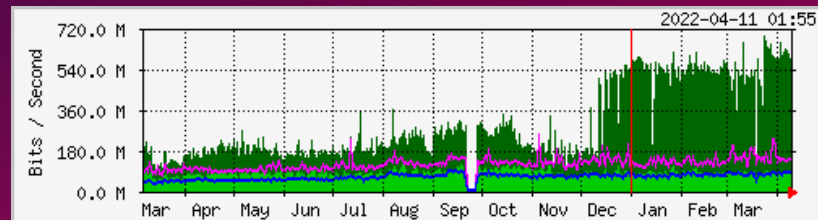

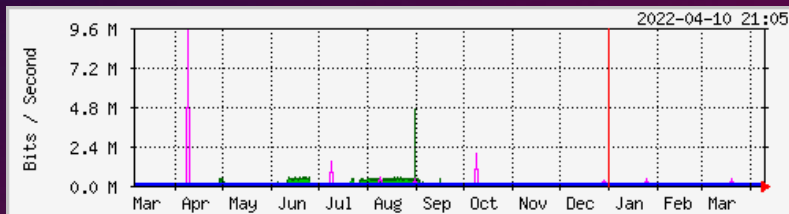

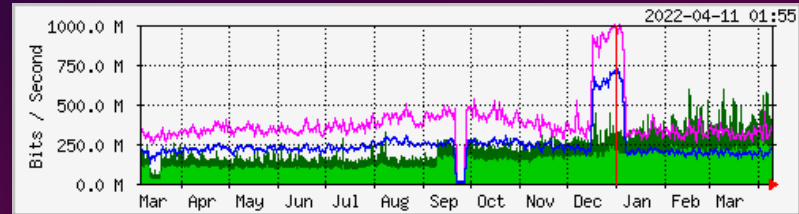

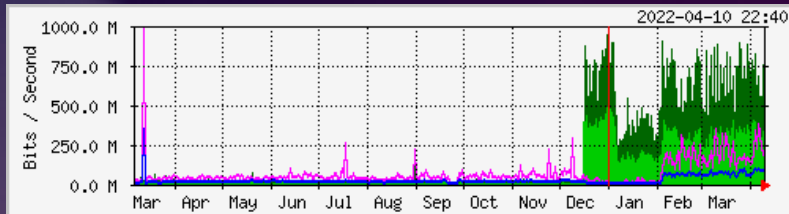

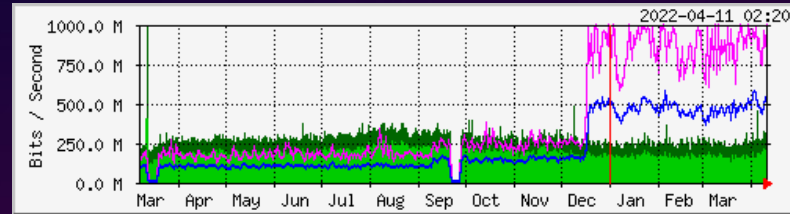

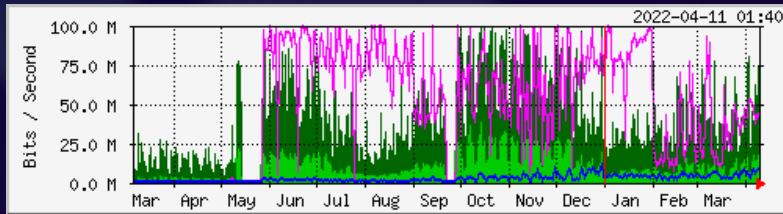

# MIXP members

- Crnogorski Telekom
- One Montenegro
- MTEL Montenegro
- Telemach Montenegro
- ISC F-ROOT TGD1
- University of Montenegro

# Connection option

- Due to small traffic MIXP offered these selections:
- 100 / 30 Mbps
- 100 Mbps full
- 1000 Mbps

# Traffic 2021/2022

# Reasons for increased traffic

- Pandemic and increase of ICT use
- E-learning and online conference
- Increase in viewing multimedia content.
- Expansion of provider reach toward customers.

# Actions taken

- Due to increase of traffic it was necessary to upgrade interfaces
- As we have Cisco Nexus 3548P-10G we obtained C3850-NM-2-10G for connecting with other equipment.
- Thus, after installation of equipment we will introduce 10G interface in our offer.

Thank you!
